DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Claims 1-18, drawn to a cyclized conotoxin peptide, a composition comprising a cyclic conotoxin peptide, a process of preparing a cyclic conotoxin, and a method of treating a disease in mammals by administering a cyclic conotoxin peptide.

Applicant is required to select one peptide linker in claim 9 and one cyclic conotoxin peptide in claim 10, where each peptide is identified with a "SEQ ID NO:". Each amino acid sequence is considered, absent factual data to the contrary, a distinct peptide. This is not species election.

The claims, which contain distinct cyclic conotoxin peptides, are directed to different inventions, which are not linked to form a single general concept. The claims containing distinct conotoxin peptides do not have in common the same or corresponding technical features. In particular, claims are directed to distinct peptides and/or methods, which use different peptides and produce different effects. Accordingly, the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept and lack of unity is deemed proper.

Art Unit: 1653

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
